

# FENIL SOJITRA

Python Developer | AI / ML Engineer | Machine Learning | Data Science

Rajkot, Gujarat, India | +91 8828657061 | [fenilsojitra242@gmail.com](mailto:fenilsojitra242@gmail.com) | [LinkedIn](#) | [GitHub](#)

---

## PROFESSIONAL SUMMARY

---

Python Developer and AI/ML Engineer with 6+ months of hands-on experience in Python development, data analysis, and machine learning. Comfortable working with data from cleaning and preprocessing through model training and evaluation. Experienced with Python, SQL, Pandas, NumPy, Scikit-learn, ensemble learning, XGBoost, LightGBM, FastAPI, and REST APIs. I enjoy turning data and machine learning models into practical applications that solve real problems.

## CORE TECHNICAL SKILLS

---

**Programming:** Python, SQL, Object-Oriented Programming (OOP)

**Data Analysis:** Pandas, NumPy, Matplotlib, Exploratory Data Analysis (EDA), Data Cleaning, Data Preprocessing

**Machine Learning:** Scikit-learn, Regression, Classification, KNN, Random Forest, Ensemble Learning, Bagging, Boosting, Gradient Boosting, XGBoost, LightGBM

**ML Techniques:** Feature Engineering, Feature Scaling, Model Training, Model Evaluation, Predictive Modeling

**Evaluation:** Accuracy, Precision, Recall, F1-Score, MAE, MSE, RMSE,  $R^2$ , ROC-AUC

**Backend & APIs:** FastAPI, Flask, Django, REST APIs

**Database & Tools:** MySQL, Git, GitHub, VS Code, Jupyter Notebook

## PROFESSIONAL EXPERIENCE

---

Python Developer | Codegrin Technology | 6 Months

March 2026 – Aug 2026

- Developed and maintained Python-based applications for different software projects.
- Used Pandas and NumPy to clean, transform, and prepare datasets for analysis and machine learning.
- Explored datasets using EDA and Matplotlib to identify trends, patterns, and useful features.
- Trained and evaluated machine learning models using Scikit-learn on real-world datasets.
- Worked with REST APIs, databases, debugging, and general backend development tasks.
- Followed the machine learning workflow from data preparation and feature engineering to model training, evaluation, and prediction.
- Applied ensemble learning techniques including Random Forest, Bagging, Boosting, and Gradient Boosting.

## MACHINE LEARNING PROJECTS

---

### Ames Valuation Studio | Machine Learning Developer | 2026

Python | Scikit-learn | XGBoost | Pandas | NumPy | FastAPI

- Developed a machine learning application for predicting house prices from structured housing data.
- Cleaned and prepared the dataset by handling missing values, transforming features, and preparing data for model training.
- Performed feature engineering to identify useful variables for the prediction model.
- Trained an XGBoost regression model and achieved an  $R^2$  score above 0.95 during evaluation.
- Built a FastAPI backend to connect the trained model with REST API endpoints.
- Connected the complete workflow from data preprocessing and prediction to the backend application.

### LinkArmor — ML-Based Malicious URL Detection System

Python | Pandas | Scikit-learn | XGBoost | FastAPI | Ensemble Learning

- Developed a machine learning system that analyzes URLs and identifies potentially malicious links using 27 lexical and structural features.
- Built an ensemble-based detection pipeline using Random Forest, XGBoost, Stacking, Soft Voting, and Logistic Regression.
- Evaluated the models on 90,036 held-out samples, achieving 99.41% accuracy, 98.51% recall, 0.9871 F1-score, and 0.9981 ROC-AUC.
- Created a web-based interface that displays threat probability, model predictions, DNS information, and URL analysis results.
- Deployed the application as a working web service for real-time URL verification.

## EDUCATION

---

**Bachelor of Science in Information Technology (B.Sc. IT)**

**SSSDIIT College | 2023 – 2026**

**CGPA: 8.12**

**Higher Secondary Certificate (12th) — Science**

**Apollo International School | 2021 – 2023**
